SUMMARY

Data-focused engineer with 3 years building production SQL Server data layers, stored procedures, fact tables, and KPI views feeding BI dashboards across dozens of enterprise customers. Combines deep T-SQL and performance tuning with C# (.NET 8 / 10) backend skills, and works AI-native - built custom agents and MCP tools that auto-generate SQL artifacts for a closed legacy system, as a reviewed, security-conscious accelerator. In a small, project-driven organization, works end to end across data modeling, DBA, on-premise-to-cloud integration, and IT, ramping fast on unfamiliar systems.

SKILLS

Data & Databases Microsoft SQL Server (MSSQL), T-SQL, Stored Procedures, SQL Views, Relational Data Modeling, Analytical Data Models (Fact tables, KPI logic), Performance Tuning (Execution Plans, Indexing), SQL Server Administration (DBA), ETL-style Data Loads

BI & Reporting Power BI, KPI Logic, Dashboard-feeding SQL Layers

Languages & Frameworks T-SQL, SQL, C# (.NET 8 / 10), ASP.NET Core; Bash / PowerShell / Linux shell; Python, JavaScript, React, HTML, C / C++ (foundations)

API & Backend REST APIs, JSON / XML, Layered Architecture (Service / Repository), Configuration-Driven / Declarative Engines, Dynamic Query Generation

AI & Automation AI Agent Development, Multi-Agent Orchestration, Human + AI-Agent Systems, Anthropic SDK, Sandboxed Execution, Automated SQL / Code Generation

AI-Assisted Development Agentic Coding Tools (Claude Code, Codex), Custom Skills, Plugins & MCP Tools, Rapid Adoption of New Tooling, Reviewed & Security-Conscious AI Workflows

Cloud & DevOps Microsoft Azure, Azure SQL Database, On-Premise-to-Cloud Integration, GitHub Actions (CI/CD), Git & GitHub, Linux / Unix

Integration & ERP Context SAP DI API, SAP Service Layer, SAP Business One, B1UP (Boyum IT)

Tools & Practices Visual Studio, VS Code, Postman, NLog, Code Reviews

EXPERIENCE

Solutions Engineer - Inspiria LTD Mar 2024 - Present

- **Designed analytical SQL Server data models** (fact tables, KPI logic, stored procedures, SQL views) feeding Power BI dashboards consumed by finance and operations teams across **dozens of enterprise customers**.
- **Architected configuration-driven data engines for multi-tenant rollouts** using declarative parameter tables and dynamic T-SQL generation. **Reduced new-customer deployment from ~1 day to under 1 hour**. Engines power vendor-risk scoring, inventory analytics, and complex financial modules (Budgeting, Aging, VAT Allocation).
- **Built custom AI agents, skills, and MCP tools that auto-generate SQL artifacts and functions for a closed legacy system** (B1UP / Boyum IT), executing within sandboxed environments. Automates recurring data-engineering work that previously required manual scripting.

SAP Business One Implementer - Inspiria LTD Mar 2023 - Mar 2024

- **Authored T-SQL fixes, stored procedures, and SQL views across dozens of enterprise customer deployments**. Root-cause analysis in production data, integrated via **SAP DI API and Service Layer**, UAT, and rollout.

EDUCATION

B.Sc. in Computer Science - Holon Institute of Technology (HIT) 2024 - 2027

Industrial Engineering Technician Certificate - Revivim College Sep 2018 - Jun 2020

MILITARY SERVICE

Industrial Operations Engineer - IDF Ground Forces, Engineering Branch Jun 2020 - Mar 2023

- Applied industrial engineering methods to operational planning and process improvement; built Excel models and authored queries against military operational systems for analysis and reporting.
