

NIV SCHENDEL

Backend Engineer | C# / .NET • SQL Server • AI-Native Delivery (Custom Agents, Skills, MCP)

niv@schendel.me • +972-52-555-5579 • linkedin.com/in/niv-schendel • github.com/schendel2606 • schendel.me

SUMMARY

Backend engineer with 3 years shipping production C# / .NET APIs, configuration-driven engines, and SQL Server data layers across dozens of enterprise customers. Works AI-native: builds custom agents, skills, plugins, and MCP tools to automate recurring engineering work, and has shipped a platform engineered for dual human and AI-agent operation under server-side guardrails - while keeping architecture, code review, and security ownership hands-on. In a small, project-driven organization, owns solutions end to end across a broad technical surface - backend, T-SQL and DBA work, on-premise-to-cloud integration, and internal IT - coordinating across teams in a matrixed structure and ramping fast on unfamiliar systems and languages. Reduced new-customer deployment from ~1 day to under 1 hour by abstracting core logic into reusable, multi-tenant components; combines layered .NET architecture with deep T-SQL, performance tuning, and SAP DI API / Service Layer integration.

SKILLS

Languages & Frameworks C# (.NET 8 / 10), ASP.NET Core Web API, T-SQL, SQL; Bash / PowerShell / Linux shell scripting; Python, JavaScript, React, HTML, C / C++ (foundations)

API & Backend REST APIs, JSON / XML, Layered Architecture (Service / Repository), OOP & SOLID, Configuration-Driven / Declarative Engines, Dynamic Query Generation, Production Hardening & Observability

AI & Automation AI Agent Development, Multi-Agent Orchestration, Human + AI-Agent Systems, Anthropic SDK, Skill / Tool-Use & MCP Pipelines, Sandboxed Execution, Automated Code Generation

AI-Assisted Development Agentic Coding Tools (Claude Code, Codex), Custom Skills, Plugins, MCP Tools & Hooks, Rapid Adoption of New Tooling, Reviewed & Security-Conscious AI Workflows

Data & Databases Microsoft SQL Server (MSSQL), Stored Procedures, SQL Views, Relational Data Modeling, Analytical Data Models (Fact tables, KPI logic), Performance Tuning (Execution Plans, Indexing), ETL-style Data Loads

Cloud & DevOps Microsoft Azure, Azure SQL Database, GitHub Actions (CI/CD), Git & GitHub, Branching Workflows, Pull Requests

Systems & IT Linux / Unix, SQL Server Administration (DBA), On-Premise-to-Cloud Integration, System Administration, Network Traffic Analysis, Cross-System Troubleshooting

Integration & ERP Context SAP DI API, SAP Service Layer, SAP Business One, B1UP (Boyum IT), Power BI

Tools & Practices Visual Studio, VS Code, Postman, NLog, Code Reviews

EXPERIENCE

Solutions Engineer - Inspiria LTD

Mar 2024 - Present

- **Built custom AI agents, skills, plugins, and MCP tools that run inside sandboxed environments and auto-generate code for a closed legacy system (B1UP / Boyum IT).** Enforces data isolation while automating recurring engineering work that previously required manual scripting, materially compressing delivery cycles.
- **Architected configuration-driven backend engines for multi-tenant rollouts** using declarative parameter tables and dynamic T-SQL generation. **Reduced new-customer deployment from ~1 day to under 1 hour.** Engines power vendor-risk scoring (VendorScoringEngine), advanced inventory models, and complex financial modules (Budgeting, Aging, VAT Allocation).
- **Owned solutions end to end across a broad technical surface** in a small, project-driven organization - backend, T-SQL and DBA work, on-premise-to-cloud integration, and internal IT - delivering across 6+ on-site enterprise engagements. Coordinated in a matrixed structure and ramped quickly on unfamiliar systems, languages, and tools.
- **Shipped production REST APIs** in C# / .NET / ASP.NET Core with input validation, structured logging (NLog), and error handling. Integrated with external systems via **SAP DI API and Service Layer**. Authored Postman regression suites covering JSON / XML payloads across critical flows.

- **Designed analytical SQL Server data models** (fact tables, KPI logic, stored procedures, SQL views) feeding Power BI dashboards consumed by finance and operations teams in place of ad-hoc reporting workflows.
- **Resolved high-volume database bottlenecks** by analyzing execution plans and applying targeted indexing strategies. Cut report runtimes in production and unblocked client month-end closes.
- **Diagnosed and resolved production defects in SAP Business One and Boyum systems under time pressure**, reverse-engineering undocumented dashboard logic through network-traffic analysis and SQL debugging.

SAP Business One Implementer - Inspiria LTD

Mar 2023 - Mar 2024

- **Authored T-SQL fixes, stored procedures, and SQL views across dozens of enterprise customer deployments.** Root-caused in production data, integrated via **SAP DI API and Service Layer**, ran UAT, and shipped to production.
- **Delivered scoped technical projects:** wrote engineering specifications, coordinated with developers, integrated via DI API / Service Layer, and documented releases for handover.
- **Onboarded new enterprise customers onto SAP Business One:** modeled and configured data structures, workflows, and reporting to each customer's processes, and debugged integration defects between SAP and third-party systems.

PROJECTS

FPL Revenue

fpl.schendel.me

- **Designed and built a full-stack Fantasy Premier League analytics platform** that syncs teams, leagues, and gameweek history and applies configurable financial rules (entry fees, payouts) to compute league standings and earnings. ASP.NET Core 10, EF Core, SQL Server, React 19 / TypeScript; layered architecture, automated tests, GitHub Actions CI/CD.

TaskManager

tasks.schendel.me

- **Designed and built a production work-management platform with lightweight CRM**, engineered for dual operation by people and AI agents under server-side guardrails. ASP.NET Core 10, EF Core, SQL Server, React 19 / TypeScript; layered architecture, multi-tenancy, GitHub Actions CI/CD.

EDUCATION

B.Sc. in Computer Science - Holon Institute of Technology (HIT)

2024 - 2027

- Core CS coursework: Data Structures and Algorithms, Object-Oriented Programming, and Advanced Programming Workshop (C / C++).

Industrial Engineering Technician Certificate - Revivim College

Sep 2018 - Jun 2020

MILITARY SERVICE

Industrial Operations Engineer - IDF Ground Forces, Engineering Branch

Jun 2020 - Mar 2023

- Applied industrial engineering methods to operational planning and process improvement within the Engineering Branch.
- Built Excel models and authored queries against military operational systems for analysis and reporting.
