

NIV SCHENDEL

Solutions Engineer | C# / .NET • SQL Server • AI-Native Automation • Enterprise Delivery

niv@schendel.me • +972-52-555-5579 • linkedin.com/in/niv-schendel • github.com/schendel2606 • schendel.me

SUMMARY

Solutions engineer with 3 years partnering with enterprise customers across dozens of accounts and 6+ on-site engagements, translating business requirements into production .NET APIs, SQL Server data models, and reusable backend engines. Cut new-customer deployment from ~1 day to under 1 hour by abstracting core logic into multi-tenant components. Works AI-native: builds custom agents, skills, plugins, and MCP tools to automate recurring engineering work, while keeping architecture, code review, and security ownership hands-on. In a small, project-driven organization, owns delivery end to end across a broad technical surface - backend, T-SQL and DBA, on-premise-to-cloud integration, and internal IT - coordinating in a matrixed structure and ramping fast on unfamiliar systems, with hands-on depth in C# / .NET, T-SQL, and SAP DI API / Service Layer.

SKILLS

API & Backend C# (.NET 8 / 10), ASP.NET Core Web API, REST APIs, JSON / XML, Layered Architecture (Service / Repository), OOP & SOLID, Configuration-Driven / Declarative Engines

Customer Engineering Discovery & Requirements Translation, Multi-Tenant Rollout, On-Site Delivery, Matrixed / Cross-Team Coordination, UAT & Production Handover, Stakeholder Communication

AI & Automation AI Agent Development, Multi-Agent Orchestration, Human + AI-Agent Systems, Anthropic SDK, Skill / Tool-Use & MCP Pipelines, Sandboxed Execution, Automated Code Generation

AI-Assisted Development Agentic Coding Tools (Claude Code, Codex), Custom Skills, Plugins, MCP Tools & Hooks, Rapid Adoption of New Tooling, Reviewed & Security-Conscious AI Workflows

Data & Databases Microsoft SQL Server, T-SQL, Stored Procedures, SQL Views, SQL Server Administration (DBA), Performance Tuning (Execution Plans, Indexing), ETL-style Data Loads

Cloud & DevOps Microsoft Azure, Azure SQL Database, On-Premise-to-Cloud Integration, GitHub Actions (CI/CD), Git & GitHub, Linux / Unix

Languages & Scripting C# (.NET 8 / 10), T-SQL, SQL, Bash / PowerShell / Linux shell; Python, JavaScript, React, HTML, C / C++ (foundations)

Integration & ERP Context SAP DI API, SAP Service Layer, SAP Business One, B1UP (Boyum IT), Power BI

Tools & Practices Visual Studio, VS Code, Postman, NLog, Code Reviews

EXPERIENCE

Solutions Engineer - Inspiria LTD

Mar 2024 - Present

- **Partnered with enterprise customers across 6+ on-site engagements and dozens of accounts:** led discovery, translated business requirements into engineering specs, and shipped iterative releases through UAT to production. In a small, project-driven organization, owned delivery end to end across a broad surface - backend, T-SQL / DBA, on-premise-to-cloud integration, and IT - coordinating in a matrixed structure and ramping fast on unfamiliar systems.
- **Architected configuration-driven backend engines for multi-tenant rollouts** using declarative parameter tables and dynamic T-SQL generation. **Reduced new-customer deployment from ~1 day to under 1 hour.** Engines power vendor-risk scoring, inventory models, and financial modules (Budgeting, Aging, VAT Allocation).
- **Built custom AI agents, skills, plugins, and MCP tools** that run inside sandboxed environments and auto-generate code for a closed legacy system (B1UP / Boyum IT). Automates recurring solution-engineering work that previously required manual scripting.
- **Shipped production REST APIs** (C# / .NET / ASP.NET Core) with input validation, structured logging (NLog), error handling, and Postman regression suites. Integrated via **SAP DI API and Service Layer** where ERP integration was required.
- **Designed analytical SQL Server data models** (fact tables, KPI logic, stored procedures, SQL views) feeding Power BI dashboards consumed by finance and operations teams.

- **Resolved high-volume database bottlenecks** in production environments by analyzing execution plans and applying targeted indexing strategies. Unblocked client month-end closes and shortened iteration cycles.
- **Diagnosed and resolved production defects in SAP Business One and Boyum systems under time pressure**, reverse-engineering undocumented dashboard logic through network-traffic analysis and SQL debugging.

SAP Business One Implementer - Inspiria LTD

Mar 2023 - Mar 2024

- **Owned production incidents and change requests across dozens of enterprise customer deployments.** Root-caused in T-SQL, wrote fixes (stored procedures, SQL views), integrated via **SAP DI API and Service Layer**, ran UAT, and shipped to production.
- **Delivered scoped technical projects:** wrote engineering specifications, coordinated with developers, and documented releases.
- **Onboarded new enterprise customers onto SAP Business One:** modeled and configured data structures, workflows, and reporting to each customer's processes, and debugged integration defects between SAP and third-party systems.

PROJECTS

FPL Revenue

fpl.schendel.me

- **Designed and built a full-stack Fantasy Premier League analytics platform** that syncs teams, leagues, and gameweek history and applies configurable financial rules (entry fees, payouts) to compute league standings and earnings. ASP.NET Core 10, EF Core, SQL Server, React 19 / TypeScript; layered architecture, automated tests, GitHub Actions CI/CD.

TaskManager

tasks.schendel.me

- **Designed and built a production work-management platform with lightweight CRM**, engineered for dual operation by people and AI agents under server-side guardrails. ASP.NET Core 10, EF Core, SQL Server, React 19 / TypeScript; layered architecture, multi-tenancy, GitHub Actions CI/CD.

EDUCATION

B.Sc. in Computer Science - Holon Institute of Technology (HIT)

2024 - 2027

- Core CS coursework: Data Structures and Algorithms, Object-Oriented Programming, and Advanced Programming Workshop (C / C++).

Industrial Engineering Technician Certificate - Revivim College

Sep 2018 - Jun 2020

MILITARY SERVICE

Industrial Operations Engineer - IDF Ground Forces, Engineering Branch

Jun 2020 - Mar 2023

- Applied industrial engineering methods to operational planning and process improvement within the Engineering Branch.
- Built Excel models and authored queries against military operational systems for analysis and reporting.
